

Beetlejuice™ Megaways™

Reels

- Each spin can have up to 248,832 ways to win.
- The number of symbols per reel does not affect the payout per symbol.
- Wins are awarded on matching symbols in adjacent reels from left to right, regardless of size.
- At the end of every spin, the number of ways for the spin is displayed in the Megaways™ meter.
- This game uses the Megaways™ game engine, under license from BTG.
- The game consists of 5 reels. Before each spin is initiated, the top half of each reel is not in play (inactive).
- The number of symbols that land on each reel is decided when the spin is initiated. This number does not change throughout the duration of the spin.
- Each reel may show 2, 3 or 6 symbols. When the top half of the reels are in play (active), this doubles to 4, 6 or 12 symbols per reel.
- The number of ways for each spin is calculated based on the number of symbols which land on each reel, and is displayed on screen.

Reel Cascades

- When there is one or more winning combination, the winning symbols will explode, and new symbols will take their place.
- When this happens, the top half of the reels will be uncovered and become active.
- The symbols on the top half of the reels will then be able to contribute towards winning combinations for the remainder of the spin.
 - Wins are calculated before the winning symbols explode.
- Any new winning combinations will be evaluated once the new symbols fill into the reels.
- The total win amount for the spin is awarded when no more cascades occur.

Symbols

- The WILD symbol can appear on any reel and substitute for all other symbols excluding BONUS and GHOST symbols.
- The WILD symbol does not have a payout of its own and requires other symbols in order to form a win.
- The WILD symbol will only substitute for another symbol if that symbol is somewhere in view, on the reels and can form a win using that symbol, or if other WILD symbols can form a win using that symbol.
- The WILD symbol may land during both the base game and Free Spins.

- The BONUS symbol is a scatter symbol and can appear on all reels. Land 3 or more BONUS symbols to be awarded free spins.
- The BONUS symbol will only contribute to a free spins trigger if it is in the active play area.

- The GHOST symbol may land on all reels with the initial spin. Once all symbols have landed, all GHOST symbols will transform into another symbol.
 - All GHOST symbols will transform into the same symbol type. The GHOST symbol can transform into any symbol except WILD and BONUS. The GHOST symbol does not always reveal a winning combination.
- The GHOST symbol cannot land after the initial set of symbols land. All other symbols may land as part of cascades, after any initial winning combinations have been calculated.
- The GHOST symbol may land during both the base game and Free Spins.

Free Spins

- Land 3, 4 or 5 BONUS symbols in view to be awarded 8, 12 or 16 free spins, respectively.
- During free spins, land 3, 4 or 5 BONUS symbols in view to be awarded an additional 4, 6 or 8 free spins, respectively.
 - At the start of the feature, a win multiplier of x1 is awarded.
 - For each cascade (or set of winning combinations), the current win multiplier will be used to multiply the win.
- After each cascade, the win multiplier will increase by 1. This increase occurs immediately after each cascade and will be applied to any new winning combination.
 - The win multiplier is displayed at all times next to the reels.
 - There is no maximum limit to the win multiplier.
- The total win during free spins is calculated during the spins and is awarded at the end of the feature.
 - Free spins are played automatically.
 - The feature will end when there are no free spins remaining or if the maximum win is achieved.
- Free spins use the same total bet and winning combination awards as the spin that triggered the feature.

LEGAL NOTICES

- Any combination of wins in a single game is limited and will not exceed \$250,000.00. It may not be possible to reach this limit in a single game from every bet configuration.
- In accordance with fair gaming practices, the outcome of each and every game is completely independent.
 - Malfunction voids all pays and plays.
- The expected return for this game is 96.00%. This reflects the theoretical return across many plays.
